

IM Hart AB

Machinery for the Pallet Industry

TURNER PVR-1000

THE PVR-1000 MAKES THE LINE MORE EFFICIENT.

Turner PVR-1000

A fast working machine with smart construction that is very simple to handle and adjust. PVR-1000 is used automatically in a machine line. The operation is, to lift the pallet and change the pallets direction from 90° to 180° The element to rotate the pallet, provides for a high efficient over lap stacking

Squeezes and rotates the pallet

PVR-1000 is a fast working machine. The turning of the pallet is controlled by an electrical engine. Make a change for a new pallet: One arm is manually adjustable to manage different kind of pallet length.

SPECIFICATION MACHINE

Machine specification facts.	Standard performance
IM Hart machine deliveries. All machines are delivered according to CE Certification and complete documentation for Electricity, Hydraulics and pneumatics all according to European standard	
Operators	
Length	2,0m
Width	2,0m
Height	2,0m
Power	1kw
Pneumatic system	7 bar compressed dried air: 200 L/min.
Should be filled and controlled	Container for lubricating oil
	Compressor not included
Hydraulic system	No hydraulic components
Machine capacity time	4 complete pallets /min (800x1200)at rotation of 90°
Standard equipment performance	Motorized tower rotation
	Motorized pallet rotation
	Pneumatic squeeze fix of the pallet

SPECIFICATION MATERIAL

Pallet size:	Minimum	Maximum
Pallet Length	600mm	1600 mm
Pallet Width	600mm	1400mm
